Quality Building Inspections LLC.

**THIS AGREEMENT LIMITS OUR LIABILITY - PLEASE READ IT CAREFULLY**

This Home Inspection Agreement (the "Agreement") is made effective on the date stated on Page 3 of this agreement by and between Quality Building Inspections Services (hereinafter as "Inspector") and client named on Page 3 of this agreement (hereinafter as "client") (collectively "parties"). Your desire to have a **general home inspection** (the "Inspection") and/or **other inspection related services** ("Ancillary Services") performed on the property located at the address stated on Page 3 of this agreement. The Services desired are indicated by checking the appropriate line beside the desired services.

**FEE:** You agree to pay the fee stated on Page 3 of this agreement for the performance of the Services. This amount shall be paid in full prior to the completion of the Services (unless otherwise agreed in writing by the parties). Should you fail to pay in a timely manner the agreed upon fee(s), you shall be responsible for paying any and all fees associated with collection, including but not limited to administration costs, attorney's fees, and cost of litigation.

**SCOPE OF THE INSPECTION:** This Inspection is a limited visual examination of certain readily accessible systems and components (designated for inspection herein) using normal operating controls and opening readily open-able access panels. The purpose of the Inspection is to provide you with information about the condition of these systems and components of the home at the time of the inspection. The inspection will be performed in accordance with the technical guidelines of the National Society of Home Inspectors ("NSHI") (referred to herein as "inspection guidelines"). (A copy of the inspection guidelines is available from us upon request and should be reviewed by you prior to accepting our service.) The Guide lines can also be found at (<https://www.nshi.us/ethicsandstandards.php>) The inspection guidelines are hereby incorporated by reference in their entirety and are hereby made a part of this Agreement. All terms used herein and not otherwise defined shall have the meaning set forth in the inspection guidelines. The inspector is a generalist and is not a licensed engineer or expert in any specific craft or trade. If the inspector recommends further action, including (but not limited to) consulting with a specialized expert(s), you must do so at your expense or otherwise assume all risks associated with failure to do so. The fee charged for this Inspection is substantially less than that of a technically exhaustive inspection. A thorough inspection Report will be provided describing the following systems and components: structural components (including foundation and framing), exterior, roof system, plumbing system, electrical system, heating system, installed central and through-wall air conditioning systems, interiors, insulation & ventilation, and fireplaces & solid fuel burning appliances. The Report will identify the following: (a) which systems and components designated for inspection herein are, in the professional opinion of the inspector, significantly deficient or near the end of their service life, (b) why the inspector deems the system or component to be significantly deficient or near the end of its service life, (c) whether further evaluation, correction or monitoring is needed, and (d) whether any system or component described herein was not inspected and why it was not inspected. We reserve the right to modify the Report for a period of time that shall not exceed forty-eight (48) hours after the Report has been first delivered to you. Nothing in this Agreement is intended to limit the inspector from reporting observations and conditions in addition to those identified herein or excluding systems and components from the Inspection if agreed to in writing and signed by the parties. Should we, as a courtesy, exceed any particular requirement set forth herein in one area, we shall not be obligated to exceed the requirements in other areas.

**EXCLUSIONS:** A system or component is not readily accessible if Inspection requires moving personal property, dismantling, destructive measures, or any action that will, in the opinion of the inspector, likely involve risk to persons or property. Anything not readily observable because it is concealed or inaccessible due to obstructions including (but not limited to) floor coverings, suspended ceiling tiles, insulation, furniture or other personal property, soil, vegetation, water, cannot be inspected. We are not required to move or disturb such items in order to diminish or eliminate the obstruction.

We are not required to report on or engage in any practice or act that is not included or that is specifically excluded in the inspection guidelines unless otherwise agreed to in writing signed by the parties. We are not required to inspect anything identified in the inspection guidelines as limitations or exclusions specific to the systems and components inspected. The list of the following specific exclusions is not an exhaustive list; see the inspection guidelines for additional exclusions and limitations. We are NOT required to determine the following: remaining life of any system or component, the causes of any condition or deficiency, methods and costs of corrections, suitability of the property for a specialized use, market value or marketability, advisability of purchase of the property, the presence of pests such as wood damaging organisms (including termites), rodents or insect, rot/decay, fungus, including mold and mildew, decorative items, underground items, breached vacuum seals in insulated glass, or items not permanently installed.

We are not required to do the following: predict future conditions including, failure of components, operate any system or component that is shut down or otherwise inoperable, light pilot lights, determine the presence of hazardous substances, enter hazardous areas, or perform engineering, architectural, plumbing, or any other job function requiring an occupational license or certification in your jurisdiction. We are not required to inspect fences, soil conditions, spas, saunas, steam baths, pools (and related equipment), outbuildings (other than garage or carport), sprinkler systems, private and community waste disposal systems, telephones, cable television, intercoms, security systems, low voltage lighting systems, any timing systems, well systems, window-unit air conditioning systems, furnace heat exchanger, and heating or cooling systems when weather conditions or other circumstances may cause equipment damage. We are not required to inspect cosmetic items such as paint, wallpaper, carpet, or other finishes on walls, ceilings or floors, and any type of window treatment (such as blinds or draperies). We are not required to determine non-compliance with manufacturer's specifications or applicable regulatory requirements, including (but not limited to) building code compliance. Water/moisture, leaks, seepage and drainage problems are often only visible during or after a certain amount of rain. It is thus impossible to observe water/moisture, leaks, seepage and drainage problems unless the Inspection is conducted during or immediately after a rain sufficient to reveal such problems. It is beyond the scope of this inspection to determine if any system or component is, has been, or will be part of any product, component or system recall in the future. Client may wish to subscribe or contact the CPSC (Consumer Product Safety Commission) for recall information regarding any system or component.

**DRYWALL MANUFACTURED IN CHINA EXCLUSION:** Quality Building Inspections is not responsible for testing, discovering or reporting drywall that was manufactured in China. Furthermore, Quality Building Inspections is not responsible for any damages that arise from or related to drywall manufactured in China.
